

"[With hydrogen], the transformation of energy-intensive sectors towards climate neutrality can pick up speed and Germany can remain competitive. After all, it is not only industry that benefits from an efficient hydrogen infrastructure, but also Germany's future sustainability." Federal Minister for Economic Affairs and Climate Action Robert Habeck, 2023

"We want to live up to our responsibility towards future generations. For us, this means that we will do everything we can to achieve the climate protection targets. We are therefore aiming for at least 15 million electric cars by 2030."

Federal Minister for digital and transport Volker Wissing 2022

INTERGOVERNMENTAL PANEL ON
climate change

"The use of CDR (carbon removal technologies) to offset hard-to-avoid residual emissions is unavoidable if net zero carbon dioxide or greenhouse gas emissions are to be achieved." IPCC Report 2022
